

I am requesting that any proposals made by you will not lessen the rules currently in Indiana's "no call" telephone privacy laws. Before implementation of the Indiana laws, I was receiving at least four calls per week. Now I do not get any of these calls.

I pay for the telephone service I have and I think that the computer generated solicitations are wrong. Some people pay for their phone service per call. It is not right that they should have to pay for someone to advertise to them. Any proposals made by you should include the Indiana laws- THEY WORK. Thank you for your time.
